ADOPTION MODELS & STRATEGIC VALUE PROPOSITION

Deployment Options & Benefits for Customers, Partners & Google Cloud

Frictionless deployment—from GitHub, local workstations, and Google Cloud Run to Antigravity and `go/aegis.ai` —turning AI compliance and security into a strategic accelerator.

GH — GitHub Repository
Deploy via GitHub repo or CI/CD
`github.com/fjhuerta-67/AegisAI`

LOC — Local & Google Cloud
Run locally (Node/Docker) or serverless on **Cloud Run + IAP + Firestore**

AGY — Google Antigravity
Run directly on **Antigravity** for instant single-instance evaluation

GO/ — Internal Google Cloud Hub
Centrally deployed at `go/aegis.ai` for Delta, PSO, GCC & Sales teams

ENTERPRISE & PUBLIC SECTOR

1. Customers

Self-Service Assurance

DEPLOYMENT OPTIONS
- Deploy directly via **GitHub repository**
- Run **locally** or on **Google Cloud** (Cloud Run)
- Run directly on **Antigravity** for single-instance use

KEY BENEFITS & STRATEGIC VALUE
- **Immediate Access to Remediation & In-Depth Pre-Audit:** Instant architectural pre-audit of AI projects paired with copy-pasteable code & IaC remediation recipes.
- **End-to-End Security & Compliance:** Automated verification against OWASP AI-SVS v1.0, ISO/IEC 42001:2023 (AIMS), and NIST AI RMF 1.0.
- **EU & Local Regulatory Orientation:** Clear, actionable guidance on how to comply with **EU regulations (EU AI Act)** and **possible forthcoming local regulations** (e.g., statutory data privacy & consumer protection laws).

Outcome: **Audit-Ready AI Architecture** — SHIFT-LEFT COMPLIANCE

GSI, MSP & ADVISORY ECOSYSTEM

2. Partners

SDLC & Advisory Multiplier

DEPLOYMENT OPTIONS
- **Same deployment options as Customers:**
- Deploy via **GitHub repo**, run **locally** or on **Google Cloud**, or run directly on **Antigravity** for single-instance use

KEY BENEFITS & STRATEGIC VALUE
- **Perform Internal Pre-Audits:** Harden and certify the partner's own internal AI accelerators, agents, and proprietary IP prior to release.
- **Customer Pre-Audits Embedded in SDLC:** Perform continuous pre-audits for customers directly integrated into delivery pipelines and **Software Development Lifecycles (SDLC)**.
- **Pre-Audits as a Service (Managed Offering):** Package and monetize high-value AI governance, security readiness, and regulatory pre-audits as a repeatable consulting service.

Outcome: **Repeatable Assurance Revenue** — PRE-AUDIT AS A SERVICE

FIELD, DELIVERY & SALES

3. Google Cloud

Internal Hub: `go/aegis.ai`

DEPLOYMENT OPTION
- Centrally deployed and accessible at `go/aegis.ai`
- Hardened on Google Cloud Run behind IAP with keyless Vertex AI ADC & Firestore persistence

KEY BENEFITS & STRATEGIC VALUE
- **Delta / PSO / GCC Engagements:** Perform structured technical pre-audits for customers as an accelerator within **Delta, Professional Services (PSO)**, and **Google Cloud Consulting (GCC)** engagements.
- **Sales-Led Customer Project Pre-Audits:** Sales and Customer Engineering teams can evaluate customer AI architectures in minutes to uncover compliance & security gaps.
- **Position Gemini Enterprise Products with Normative Proof:** Position **Gemini Enterprise & GCP AI Protection products** (Model Armor, Model Garden/Registry, AutoSxS, Model Monitoring, SCC AI) based on their direct impact and alignment with normative and regulatory obligations.

Outcome: **Consumption & Enterprise Trust** — GEMINI ENTERPRISE PULL-THROUGH

Unified Value Flywheel: Customers achieve immediate remediation, security, and EU/local regulatory readiness → **Partners** embed pre-audits across customer SDLCs and deliver Pre-Audits as a Service → **Google Cloud** (`go/aegis.ai`) accelerates Delta/PSO/GCC delivery and positions **Gemini Enterprise Products** mapped directly to normative & statutory obligations.
